Extant Aerospace Announces Acquisition of L3Harris Technologies Power Supply and Conditioning Product Line Assets and Intellectual Property

Melbourne, Florida, September 30, 2022 – Extant Aerospace (Extant), the leader in licensing, obsolescence management, and lifecycle sustainment services for aerospace avionics, electronics, and electromechanical products, announced today that it has completed the acquisition of all the assets and technical data rights pertaining to the Power Supply and Conditioning product line from the operations of L3Harris Technologies in Grand Rapids, Michigan.

The Power Supply and Conditioning product line consists of Power Supplies and Inverter/Converter units which are used to provide reliable normal and emergency aircraft power to gyros and other emergency equipment in the event of total loss of aircraft power. These units are installed in business jet, regional jet and helicopter platforms servicing the global commercial and defense markets.

“We are very pleased to add the Power Supply and Conditioning product lines to our business portfolio and proud to continue our longstanding relationship with L3Harris who continues to trust Extant’s ability to sustain and support these systems into the future”, said Jim Gerwien-Moreta, Executive Director of Extant Aerospace.

“These products align very well with Extant’s core business focus and unique supporting infrastructure for the sustainment of complex electronic systems, and we will continue to produce and maintain the Power Supply and Conditioning products with a high level of service and reliability for many years to come.”

About Extant Aerospace

Extant Aerospace (www.extantaerospace.com), a wholly-owned subsidiary of TransDigm Group Incorporated (NYSE:TDG), with headquarters in Melbourne, FL, specializes in supporting Original Equipment Manufacturers (OEMs) with product licensing, obsolescence management and reengineering, lifecycle sustainment, and counterfeit prevention services for aging, non-core electronics, avionics and electromechanical products used in various, military, business and general aviation, and commercial airline applications.

Extant's programs and resources provide a high quality solution to the challenges that often accompany the continuing aftermarket support of these systems and components and enable OEMs to focus their resources on more current products and new product research and development. Extant is well positioned with both the technical expertise and capital resources needed to provide OEMs with immediate value for non-core assets, a timely and successful product line transition, and a continuing high level of aftermarket customer service and support.
