

Converter Converter Regulator Battery Charger Control Unit (BCCU)

Part Numbers

705580 Converter

709290 Converter Regulator

711150 Battery Charger Control Unit (BCCU)

Product Overview

Converter:

500 Watt DC power supply. Approx. 24VDC @ 20Amps output, 16VAC 3-phase @ 1200Hz input

Converter Regulator:

Accepts AC and DC electrical inputs from the aircraft and provides regulated DC output to the flight control system inverter. Contains voltage and current level detection logic to monitor power sources and provide fault/status signals.

Battery Charger Control Unit:

Provides charge current to the aircraft battery, controls the flow of power from the battery to the various aircraft loads, and provides indications to the pilot as to the status of the battery system.
