

TEAC_MDDS

Mission Data Debrief Software

Product Overview

Mission Data Debrief Software (MDDS) is a comprehensive easy to use digital debriefing system that efficiently manages mission videos, time, events, and other mission related information. A standard PC platform allows instantaneous review of event marks or special times in the flight to focus on mission objectives.

Synchronized Video and Audio

Simultaneously Display 4, 8 and more Video Screens

Simultaneously Debrief Multiple A/C

Editing, Event Bookmarking and Mission Timeline Management

Part Numbers
